

18th Annual
BULL & FEMALE SALE

SATURDAY APRIL 2, 2016

*at the farm 1 mile East of Goodeve, SK
& 3 miles North*

LUNCH AT 12:00 NOON - SALE AT 1:00 PM

Welcome.....

Welcome to our 18th annual bull & female sale. We would like to thank our customer base who have chosen our program as the source of their herd bulls and replacement females over the past 18 years. It pleases us to continue to see customer herd bull pens that consist of predominately Crescent Creek bulls. We hope our philosophy of raising Angus cattle that fit the various needs of an ever growing and prosperous beef industry will make you consider using our program again.

As in the past, our offerings are solid from top to bottom. The bulls offered will fill any needs. They have never been pampered or overfed. Your requirements for herd bulls is always on our minds; whether it is feeding of sale bulls or the selection of new herd bulls.

Our selection of females also offers lots of excitement, as we have chosen a cross section of replacements from our very consistent cow families. On this summer's Angus Tour we received many compliments of the udder quality, feet, and legs of our cow herd. Over sixty years of selection and breeding has its dividends. We are very confident these young females will continue on in the Crescent Creek tradition. In this offering, you will be able to select females that will be able to fit into any embryo program, compete in a show class, and be able to swath graze and lick snow. They offer outcross genetics that are proven and predictable.

Just a note, the cattle will sell on video again this year, but we have opted out of a video internet broadcast sale online. If for any reason you think you cannot attend the sale, please feel free to contact us to discuss your requirements. Also, our sale staff is very knowledgeable of the offering and our program. Video of the sale offering is available on our website www.crescentcreekangus.com and Livestock Media +

Plan to attend our sale Saturday April 2nd for hospitality and the finest offering of Crescent Creek genetics to date. We would like to thank everyone who helps to put this special event on. Remember, the coffee is always on and we would enjoy showing you around.

July 4, 2015 Austen & Katie Anderson

SALEBOOK

Barn Spider Designs - Erin Sawley

These great days in the beef business were long looked forward to. As was said many times "the best way to meet the future beef needs – is to have your cow herd in as good a functional shape as possible."

Crescent Creek Angus, a family operated farm, have done exactly that. This cow herd is possibly in as good a state as ever. The summer of 2015 saw many visitors look at and appreciate a great cross section of the herd. This SAA field day found positive, excited response and comments from the many visitors. As a follow up at weaning time, the best, heaviest set of calves were weaned this past fall. The cows did a great job!

Now you too can enjoy this success. Purchase seedstock from this Crescent Creek program. The genetics offered here are a refreshing alternative to most programs again highlighted the fact that Wes and family pursue unique quality genetics. The best set of bulls calves are available for your pleasure. They are performance tested, and semen tested.

What a special set of heifers as well folks. Once again prospective brood cows at their finest. They represent the great cow families developed at Crescent Creek while being sired by their current great herdsires.

Repeat buyers have been the backbone of the great customer base and that certainly speaks volumes. Each and every year the hospitality is second to none – please join everyone on sale day....

If you are unable to attend please forward all inquires to any of the sale staff, Wes & Family or OBI; we all can certainly help you with your questions and selections

AVERAGE BLACK EPDS FOR ALL CALVES BORN IN 2015

	Birth Weight	Weaning Weight	Yearling Weight	Milk	Total Maternal	REA	Marb	Fat	Carcass Weight
EPD	+2.2	+45	+80	+19	+41	+0.33	+0.39	+0.015	+22

What do the numbers mean?

For most commercial cattlemen, there are really only four EPDs they need to look at: birth weight (BW); weaning weight (WW); yearling weight (YW); and milk. The others, with perhaps the exception of the carcass traits, are more useful for purbred breeders.

BIRTH WEIGHT - Calf weight at birth adjusted to a mature dam equivalent. Expected progeny difference is reported in pounds. The larger the EPD indicates a heavier average birth weight

WEANING WEIGHT - Calf weight taken between 160 and 250 days of age and adjusted to 205 days of age and a mature dam equivalent. Expected progeny difference is reported in pounds. The larger EPD indicates a heavier average weaning weight for calves sired by that bull.

YEARLING WEIGHT - Weight taken between 330 and 440 days of age and adjusted 365 days of age and a mature dam equivalent. Expected progeny difference is reported in pounds. The larger EPD indicates a heavier average yearling weight for calves sired by that bull.

MILK - The milk EPD is a predictor of a sire's genetic merit for milk as expressed in his daughters, or in other words the part of weaning weight attributed to milk genes. The larger EPD indicates heavier average weaning weight due to daughters greater maternal ability.

CALVING EASE

Bulls have been rated (in our opinion) on calving ease ability

* - recommended on cows

** - moderate birth

*** - indicates calving ease elite

*** CALVING EASE

HOW MUCH WILL A BULL COST OR HOW MUCH SHOULD I PAY FOR A BULL?

Bull Production:	If A Bull Ads	30 lbs/calf
	With	30 calves/year
	Works For	3 Seasons
	Extra Pounds Genertaed	2700 lbs of calves

At a modest \$2/lb you realize an extra \$5400. If you have been paying \$4000 for your bulls, this added revenue would allow you to pay an extra \$4000-\$5000 per bull. As well extra benefits from adequate bull power will mean less open cows, a tighter calving season and more uniformity – these all reflect in higher premiums. These are the management decisions that you as a producer can make to contribute to a greater bottom line for your operation. Enjoy the rewards of the beef industry to the fullest.

Video Sale

**ALL BULLS WILL BE PENNED OUTSIDE PRIOR & DURING THE SALE.
CATTLE WILL BE SOLD BY VIDEO. NO CATTLE WILL ENTER THE RING**

Herd Health

The vaccination program consisted of Express 5 and blackleg shots. All breeding females & bulls will have had their pre-breeding Express 5 vaccine and blackleg booster prior to the sale. The cattle have had plenty of exercise in large pens, and are very free moving.

New for 2016

A selection of bulls have been Zoetis 50K tested.

An exciting start to our 18th sale. Top and bottom Crescent Creek bred from one of the most consistent cow families here. His sire, 20U, is a son of none other than ROSEBUD 115F. 20U was our high selling bull in our 2009 sale to Bronyx Angus. 12C is an exceptional bull full of Angus character: wide topped, long bodied, with an excellent foot. Appreciate the muscle and meat in this fellow, a definite sale feature.

This bull can easily be ranked number one in our bull pen! Long, freely moving, big crested bull out of a very good first calf heifer. This Imprint son is an eye catcher, long, deep, and has all the angus character! He's a bull that will make you look twice and keep looking. Out of an exceptional Chisum first calf heifer! This chunker will get all the attention on sale day!

Retaining 1/3 Semen Interest

Lot 2

This is another thick, long, free moving Imprint son. Out of one of the best cows in Wade's herd, her calves never disappoint and that goes for the same on this Imprint Son. With all your top Angus features he will catch your attention in the pen! This is the bull on sale day to come and check out along with his mother

FORTITUDE was chosen for our AI program partly for his excellent birth to yearling spread, but more so for his proven and predictable pedigree. The bull did a wonderful job leaving exceptional calves, breeding true as his calves came moderate with ample growth. FORTITUDE would be a half-brother to the popular Baldrige WAYLON. We will once again use FORTITUDE in our AI program this year.

These two fellows could be the most talked about bulls come sale day. Breeders talk about Angus type & character and this is a pair with all that and more. You will travel many a mile to find bulls with the old Angus look: huge crests, big middles, wide rumps, and large testicles all packed on a moderate frame.

Both are grandsons of Crescent Creek BRAVEHEART 35F who left a legacy at Sandy Bar Ranch.

We will retain 1/3rd interest in Lot 15. Backed by one of our really exciting young cows here on the farm.

Crescent Creek Fortune 67X
Co-owned with Sheidaghan Angus

67X continues to impress with another strong offering this year. The bulls are uniform in type and size. The maternal strength of this bull will be admired for a long time as his pedigree is stacked with some of the most predictable bloodlines around. Bulls with plenty of frame and lots of capacity on very sound feet & legs. A nice sire group to choose some ½ siblings from.

A definite herd bull

Wade's 28C starts this sire group. A definite herd bull with extra length and eye appeal that will raise the type of steers sought after by the order buyers.

His dam, 30X, had the lead off bull last year in this sire group. 30X is now an "Elite" dam under the Canadian Angus Performance program. Lot 17 is a maternal brother to Barkman's 2015 sale purchase.

Lot 18

The FORTUNE bulls represent a group of bulls that will make excellent choices for maternal strength. If raising replacements is your requirement then check them out. 33C comes highly recommended out of one of the best cows here: 124X, who was the mother of the high seller in last year's sale for 18,000 to Pine Grove Farms at Val Marie Saskatchewan.

GRANDSIRE SITZ WISDOM 481T

In two calf crops, WISDOM 1419 exceeded all our expectations. He did an excellent job covering cows and was one of the most aggressive breeding bulls I have seen, achieving a very high pregnancy rate in the first cycle. His offspring are performance cattle: they come with moderate birth weight with a huge spread in weaning weight and yearling weight. If performance is your biggest criteria for weaning and yearling weight then look no further, these sons are unmatched. A perfect animal for those who breed by numbers. His first daughters are now calving and they are excellent.

--------	------------	------------	-------------	-----------------

We had the misfortune of losing 1136 this fall. His influence was an integral part of our breeding program and the results were just starting to bear fruit. With no semen banked, we will rely on a son or two to continue his lineage. He was a total outcross to our program that fit with the type of cattle we want to produce. His sons are likes peas in a pod, no one is better than the other. His females are marveled by those who have seen them in production.

Here is another sale feature. The STUMPIE cow family rivals the ROSEBUDs for production here. 133C is a full sibling to one of the high selling females in the 2015 sale to Sheidaghan Angus. When you hit the pen this fellow catches your eye immediately. An animal with herd bull presence, full of muscle and meat.

His dam consistently produces the best. Maternal brother working for Terry Berezny. Want some excellent commercial replacements? Try to pry his loose.

Lot 44

*** CALVING EASE

A sale feature that could have easily been lot number one. We appreciate this bull more and more each day. His extra length, tabletop loin, and free moving gait will endear him to any breeding program. His outcross pedigree should make him very desirable.

Here is the only time you can actually bid on an American pedigree that will not cost you an extra 40%. Be sure to check out 100C; the maternal brother is working at Star City Colony and the reports are good.

206 continues to carry on the CHISUM line here at Crescent Creek as these continue to be cattle with excellent performance. Sons of 206 have always had great hair and excellent feet along with being deep sided and easy doing.

The daughters are broody and on track to be good mother cows. The 206 sons are cow bulls and it is easy to see why.

DTZ 103B LOT 40 IN 2015 SALE - MATERNAL BROTHER TO LOT 50

The lead-off bull in this sire group.

If deep-sided and easy doing bulls with a little extra push on the scale are your requirements, then this is the bull for you.

Fred Lansdall purchased his maternal brother in 2015, adding another strong bull to an already stellar herd bull pen.

Lot 50

The top performing bull in this offering

Gained over four pounds a day on ration fed for a three pound gain.

These 206's are big performance bulls.

CRESCENT CREEK MCCOY 10C

MALE WOS 10C JANUARY 23 2015 1847454

Another definitive sale feature, this animal is extra thick and stout with a moderate frame to boot. This excellent animal had a moderate 70 pound birth weight from a first calf heifer.

Backed by the QUEEN RUTH family, this is an elite calving ease bull.

Crescent Creek HEIFERS

It might sound like hyperbole, but we truly feel that this year's batch of heifers is one of our most exciting offerings in years. Deciding what to sell and what to keep was all the more difficult this year. This is an offering of replacement females who all could have stayed home and continued to perform. But we wanted to offer the full selection of our brood cow base to our customers. Customers who demand strong and well recognized cow families that have raised exceptional bulls for the past 45 years. Be it a strong string of two year old bulls sold over 15 years at the Regina Bull Sale, over 400 bulls sold privately to a ranch in Idaho, or 18 consecutive on farm sales.

Some of the sire groups we chose are larger than others in order to give you an opportunity to purchase 1/2 and 3/4 sisters in volume. We have also offered females out of breed-leading AI sires. Here is an opportunity to start new cow families or become involved in one of the greatest breeds around. We decided to do this at a time when everyone is gearing up to buy herd sires. This is a great time to make an investment and gain some excellent genetics. Our heifers are offered at a 60% sale day, 40% October 1st 2016 payment plan.

Why do we do this? We believe in our product, our herd, and our pedigree. We are a seed stock producer with bloodlines built and proven over sixty years.

Regardless of your needs or price range, we will have heifers that you can depend on

We start this year's female offering with a heifer that has a fantastic future. If it wasn't for this summer's Sask Angus herd tour, we would probably be retaining this female. Many guests complimented us on our herd and on this heifer in particular. The JOAN cow family is one that we are building up for future dividends. Originating in the Gartner-Denowh herd in Montana, this female's mother is outstanding. We had an opportunity to purchase one of their top animals and now we would like to pass that opportunity on to you. Out of KG WISDOM 1419, this is the type of animal that will lay down and produce the next great animal.

Crescent Creek Fortune 67X
Co-owned with Sheidaghan Angus

This is a sire group we are very proud of as it is what I refer as the "Home Grown Group". 67X has done an excellent job here, siring calves that are very consistent in type regardless of their gender. I believe his real strengths lay in his daughters. Their udder quality is excellent and the animals possess a disposition that makes our jobs that much easier. His pedigree is flawless and represents some of the best in the breed. Buy in volume when it comes to these great cows.

Compare those amounts to the amount of estrogen circulating in your body right now⁵

ADULT FEMALE
ESTROGEN = 480,000 ng
Would have to eat **95.3 cows'** worth of beef produced using hormone implants PER DAY (1-222 kg each) to match her own daily production of estrogen.

ADULT MALE
ESTROGEN = 120,000 ng
Would have to eat **27 cows'** worth of beef produced using hormone implants PER DAY (1-222 kg each) to match his own daily production of estrogen.

PRE-PUBERTAL GIRL
ESTROGEN = 54,000 ng
Would have to eat **10.7 cows'** worth of beef produced using hormone implants PER DAY (1-222 kg each) to match her own daily production of estrogen.

PRE-PUBERTAL BOY
ESTROGEN = 41,000 ng
Would have to eat **8.2 cows'** worth of beef produced using hormone implants PER DAY (1-222 kg each) to match his own daily production of estrogen.

ESTROGEN | Amount of estrogen (1 kg = 1 billionth of a gram)
OF COW EQUIVALENTS | Produced with the use of hormone implants

Birth control pills are effective because they contain hormones that are specially treated to protect them from being broken down by the acids and enzymes in your digestive system. Naturally occurring or implant hormones are not protected from digestion, meaning that the extra amount you may consume from eating beef produced with the use of hormone implants is not absorbed by the body in any significant amounts.⁶

Researchers believe that increased body fat levels in young children, not hormones in food, is one of the major causes of early onset puberty.⁷
